Technical training and other educational outreach efforts are intended to foster new energy efficiency impacts, renewable energy system applications, and other energy service enhancements through increase education and awareness for customers, contractors and other trade allies.

OVERVIEW

Technical training classes, lunch-and-learn meetings, conference sponsorships and presentations, and educational outreach are all effective and complementary tools that help you and your business partners make informed decisions about energy and take advantage of our customer services.

FOCUS ON ENERGY

The statewide program, Focus on Energy, offers a variety of training courses for businesses and contractors that concentrate on ways to manage energy use more effectively, improve operational productivity, and reduce overall costs. Courses are offered at numerous locations throughout the state and details can be found at focusonenergy.com.

ENERGY CENTER OF WISCONSIN

Energy Center of Wisconsin (ECW) offers more than 40 half-day and full-day training courses and online continuing education programs through the Energy Center University. The ECW targets many of their courses at building professionals, contractors, and designers, but also addresses technical topics suitable for business owners, facility managers and utility representatives. Currently, WPPI Energy members have elected to be Gold-level sponsors of the Energy Center University through a designation of allocable membership dues to the Energy Center of Wisconsin.

At Cedarburg Light & Water Utility, we believe affordable public power strengthens our community and helps our neighbors. That's why, through WPPI Energy, we're partnering with other local not-for-profit utilities to share resources and lower costs.
