

# START SAVING WITH A SMART THERMOSTAT

**A smart thermostat is a Wi-Fi enabled device that “learns” your habits to help manage heating and cooling costs.** Its energy-saving setback feature adjusts HVAC equipment based on your unique energy profile and the weather outside, so you can save energy and money without sacrificing comfort. A smart thermostat can save up to \$120 annually and typically pays for itself in two years. For a limited time, Cedarburg Light & Water residential and general service business electric customers who purchase and install a new, qualifying smart thermostat can earn a \$75 bill credit from Cedarburg Light & Water. To receive your incentive complete and return the form below with proof of purchase and the model number.
